Profile

I am an enthusiastic, innovative and self-motivated network and system administrator. I have worked with Linux and Unix as well as Windows in the past. To finalize my bachelor degree in Applied Computer Science I am looking for an (international) internship in the system and network administration (IT) department.

Personal information

Date of birth: 9th May 1988

Place of birth: Anderlecht, Brussels

Citizenship: Belgian

Sex: male

Languages: Dutch (native), French (native), English (good), German (notions)

Professional experience

Gentaur Belgium, spring and summer 2009

Gentaur is a world leading biochemical distributor. With limited own staffing, Gentaur hired me as “freelance” network and system administrator. I was in charge of solving their 1st line problems, as well as some more advanced Windows Server or Exchange issues.

ING Bank Belgium, November 2006-July 2007

As a Customer Direct Channel Support (1st line, call center). I was responsible for solving technical issues with ING's customers and their internet banking software, as well as limited commercial activities for ING (cross-selling). ING supported all Windows platforms, Mac (8, 9 and X) and Linux. Support was mainly given by phone and e-mail.

DHL Belgium (holiday job), August 2005

As a 2nd line field support employee at the IT-department of DHL Belgium, I was responsible for solving onsite hardware and software issues.

Rootspirit, 2004-present

Rootspirit is a Dutch company, started by 3 friends. We started this with the idea to learn and explore Linux (and later on other operating systems as well) in a professional environment. To fund the startup of Rootspirit we decided to commercially sell hosting, but recently we have ceased all commercial activities and all server are used for non-profit or personal activities only. I am responsible for server administration, as well as technical and commercial support.

Brosella, 2006-present

Brosella is a non-profit organization providing Brussels with year-round (usually) free festivals and events. As volunteer I started with updating all content on the website; but I now also manage their workstations as well as their storage server. During Brosella's biggest event, I am responsible for providing the whole festival ground with internet and WiFi access.

Education

2000-2006: K.A. Grimbergen (Brussels, Belgium): Economy & Modern languages.
ASO (high school) degree

2007-2010: Karel de Grote (Antwerp, Belgium): Network & System Administration
Bachelor Applied Computer Science (currently in my 3rd year)

IT related Skills

Linux

Experienced with Gentoo, Debian and Ubuntu distribution. I manage Linux servers where both security and the services are very important. I am experienced with firewalls (iptables) on Linux, as well as services, like Apache, nginx, openvpn, MySQL, Squid, FTP, Bind, statistics and logging, Samba and more. I have over 7 years of Linux experience.

Mac OS X

Experienced with Mac OS X and Mac OS X Server and have set up numerous services on a Mac, in environments where security is of the utmost importance.

Windows Server

Experienced with both Windows Server 2003 and Windows 2008. Over the years I have set up all important services, like Active Directory, DNS, IIS, Auditing and Exchange. I also have some knowledge of Powershell.

UNIX

Deployed openBSD a few times and I am familiar with setting up simple services such as SSH and Apache. I also worked with IBM AIX for a short amount of time.

Cisco

I am certified for CCNA 1 to 4. The CCNA certifications will be given to me at my graduation.

Virtualization

Knowledge of Xen (running with a Linux host).
As for VMware, I have good VMware server and a some ESXi (and vSphere) knowledge.

Programming

Over the years I have done limited programming work to support my system administration duties. Although this is not the main focus of my profile, I can manage in Java, C, C# and PHP.
